

## **Maurizio Rigolio**

Maurizio Rigolio has 21 years of professional experience in Design HSE.

He has worked first in a consulting Company and then in an EPC Contracting Company.

Currently Head of a Department of about 40 persons in his organization, he is responsible for the correct implementation of HSE and loss prevention requirements during the design phase of EPC Projects; he's leading also specialized groups which are dealing with Noise Control Design, Environmental Engineering and Permitting and Authority Engineering

He's a professional HAZID, HAZOP and SIL Chairman and he has lead several Process Hazard Analysis and Pre-Start Up Safety Review for various Projects in different Countries.

That has allowed him to get a broad and deep understanding and experience in process safety matters.

He's a member of European Process Safety Congress and of Italian Electrotechnical Committee for Hazardous Areas Classification

Throughout his career Maurizio has travelled a lot; his passion for foreigner cultures and ways of living has helped him establishing fair relationship with clients, consultants and authorities which were important for the success of his work.
