

Elodie Le Cadre

“Dr. Elodie Le Cadre Loret is Research and Innovation Program Manager at ENGIE Research & Innovation, engineer and doctor in energy economics with 14 years of experience in industry. She manages key international partnerships for ENGIE and is in charge of technology watch on emerging technologies that she promotes in and out of ENGIE. After a 4 years position in an investment fund (group AVRIL), Elodie joined ENGIE at the Strategy department in 2012 as energy market analyst for the European and North American countries. Then she had various positions at the ENGIE Lab CRIGEN from 2015 to 2019. She managed national and European R&D projects on digitalization of biogas units and biomass supply chain. In 2019, she joined ENGIE corporate research department to be lead scientific advisor.

Elodie is an expert in bioenergies and energy economics. She is an accreditation committee member of the Capenergies cluster and expert for the Solar Impulse Fondation and she is teaching in different Master 2 on biogas and carbon removal technologies.

Elodie Le Cadre Loret holds a PhD in Energy Economics from IFPEN, University Paris-Nanterre and AgroParisTech. She is also engineer in agronomy specialized in public policies and agricultural economics and she is graduated from IFP School.”
