

Dr. Pratima Rangarajan

Dr. Pratima Rangarajan is the CEO of Climate Investment where she leads our team in driving impact and returns through our investments in under-served GHG-intensive sectors within energy, industry, built environments and transportation. Dr. Rangarajan is responsible for the firm's engagement with OGCI member companies, senior stakeholders, investors, customers and operators across the wider energy and industry ecosystems, and for driving collaboration opportunities to scale and accelerate emissions reduction. Before joining Climate Investment in 2017, Dr. Rangarajan was the General Manager for GE's Onshore Wind product line and the General Manager for GE's Energy Storage start up. She had previously held the role of Deputy Chief Technology Officer and Senior Vice President, Emerging Technology and Research at Vestas Wind Systems. Pratima has a PhD in chemical engineering from Princeton University and a BS in Chemical engineering from Massachusetts Institute of Technology. Dr. Rangarajan is a Fellow of the Royal Academy of Engineering in London, where she is based.
