

Angeles Blanco Suarez

Catedrática del Departamento de Ingeniería Química y de Materiales
Grupo de Investigación de Celulosa y Papel
Facultad de Ciencias Químicas
Universidad Complutense de Madrid

Full Professor. Department of Chemical Engineering and Materials, Universidad Complutense de Madrid (UCM). Since 2004 Director of the Research Group of Cellulose, Paper and Water at UCM. From 2005 to 2015 Director of the Advance Laboratory UCM-HOLMEN.

Since 1990, she has been working on research topics related to the improvement of industrial processes, development of sustainable processes, the treatment of process water and effluents for water reuse and waste treatment. The works are developed in two parallel lines, one fundamental to generate new knowledge and one applied to apply knowledge to solve industrial problems. Thus, she has received the Ken Madderm Award, 2017; the first UCM Technology and Knowledge Transfer Prize in 2016 and the Prize "IIBCC Excellence Award in Recognition of Outstanding Research on Inorganic Bonded Composites" in 2008, for the innovative nature of her works and the implementation of results at industrial scale. She has been 6 years Vice-President of EFPRO and Board Member of the EWP for more than 10 years.
