*14th International Symposium on
Loss Prevention and Safety Promotion
in the Process Industries*

12-15 May 2013, Florence, Italy

Organized by

The Italian Association of Chemical Engineering

AIDIC

Welcome

Welcome to the 14th EFCE Symposium on Loss Prevention and Safety Promotion in the Process Industries.

This Symposium shall be a market place for

- presenting new scientific results and concepts
- exchanging of best practices
- learning from experience and case studies

Nearly 40 years have gone by, since safety professionals, scientists and practitioners met on EFCE Loss Prevention Symposia and in this period considerable progress has been achieved in the field of safety in the process industries. The latter includes besides the chemical industry, also oil and gas, energy, pharmaceutical, food and other industries as well as the related service industry.

Despite this progress, we are still witnessing major incidents in Europe and all over the world. Therefore exchanging information and stimulating the development of new methods and the dissemination of data, implementing process safety management which may reduce the risk of fires, explosions and loss of containment in the process industries, is a must and a need.

In the meantime, innovation leads to new processes under yet unknown conditions and introducing potential new hazards from novel or emerging technologies, and materials. Hence, there is a continuous need for further research and development in the field.

To foster new ideas the EFCE Excellence Award for Process Safety will be assigned to outstanding PhD research work for the second time on this conference.

Transfer to practice is as important as development of know-how, and quite some challenges are still to be addressed in order to make further progress in process safety. To name a few: closing the loop from operational experience back to design, development of sufficiently detailed models for emergency response planning, development of the resilience engineering approach, involvement of all levels of management and in particular the operational management level, and so on.

Let us therefore take the opportunity of this Symposium, to learn from each other, to transfer experience and to preserve existing know-how for the benefit of the process industry and the safety of employees and the public.

Loss Prevention 2013*

Venue

LOSS PREVENTION 2013 will be held at
Firenze Fiera - Villa Vittoria - Piazza Adua 1, 50123 Firenze
www.firenzefiera.it

The exhibition and congress facilities of Firenze Fiera spa are among the most important and best equipped in Italy and they are located in the historical center of Florence. Florence International Airport "Amerigo Vespucci" is located 4 km from Florence city center. Santa Maria Novella Central Station: 80/100 metres from Palazzo degli Affari.

Registration

To attend LP2013 symposium a registration fee is required.

early payment: Euro 900 (taxes included) - to be made before March 1st, 2013
early reduced payment : Euro 550 (taxes included) - only for students & PhD students

regular payment : Euro 995 (taxes included) - from March 2nd, 2013
reduced payment : Euro 600 (taxes included) - only for students & PhD students

Visit <http://www.aidic.it/lp2013/registrations.htm>

Accommodation

Participants have to make hotel reservation by themselves.

A number of hotels have been selected in collaboration with Florence Convention Bureau for this purpose.

The list of hotels is available visiting
<http://www.aidic.it/lp2013/accommodation.htm>

The hotels are located close to the Congress venue and are all walking distance.

Social program

Sunday evening, May 12

Welcome cocktail will be held at the centuries-old garden, which surrounds the venue Villa Vittoria-Palazzo dei Congressi.

Tuesday evening, May 14

Conference dinner will be served on May 14 at Villa Castelletti, Firenze Signa

One of the most beautiful luxury villas in Italy. This estate has its origins in the 14th century and it is one of the oldest villas in Tuscany. Its wonderful altana with a panoramic view over Florence distinguishes it from the Medicean villas and most of the Chianti villas.

The villa probably dates to the early 1400s. The first owners were probably the Strozzi family, followed by the Lapi, the Ugucioni, and the Cavalcanti.

The direct line of this family—that of the poet Guido, Dante's companion—died out in the 18th century but continued in the

Cattani-Cavalcanti branch. The Cavalcanti family enlarged the structure of the villa by adding two side wings to the central portion, on which they raised the second story and the roof loggia that is today the symbol of Villa Castelletti.

In the second half of 1800, Count Leopoldo Cattani Cavalcanti transformed the property into a model agricultural estate. The most significant related initiative was undoubtedly the foundation of the Istituto Agrario Filantropico (Philanthropic Agricultural Institute). In the late 1800s the estate became the home of the Montagliari Mayer counts, of Germanic origin.

Discover Florence !

A city that is a true world heritage and the cradle of the Renaissance, offers a variety of unique artistic paths. Walking around Florence is an open-air exhibition of art and culture, where every corner is a great testimony of the past. Museums, galleries, churches, streets, squares, palaces, unique elements that makes Florence a breathtaking city. Not only art and culture, but also an extraordinary cuisine, made of ingredients known around the world.

Florence also offers shopping streets, entertainment, sports, events and meetings throughout the year. And just out of town, Fiesole, Settignano, Chianti and a region, Tuscany, where cities and countryside do not fear any comparison.

Visit <http://www.aidic.it/lp2013/socialprogramme.htm>

Exhibitor & Sponsor

Companies and organisations willing to support the Conference are invited to contact the Secretariat for further information. Participants from industry are welcome.

EXHIBITORS

Additional exhibitors will be soon confirmed at <http://www.aidic.it/lp2013/supporter.htm>

Format & Topics

The technical program (plenary papers, full and short oral papers, posters, etc.) will be structured into 4 parallel sessions. The preliminary time table includes registration and welcome on Sunday, and from Monday to Wednesday, paper presentations.

THEME 1 – RISK MANAGEMENT AND REGULATORY ISSUES

THEME 2 – HUMAN FACTOR AND MANAGEMENT SYSTEMS

THEME 3 – LEARNING FROM ACCIDENTS AND KNOWLEDGE TRANSFER

THEME 4 – PROCESS SAFETY ENGINEERING

THEME 5 – MATERIAL HAZARDS

Detailed schedule of presentations will be available online the end of March.
