

## **Professor Richard Stuetz**

### **CV**

Richard Stuetz is a Professor in the School of Civil and Environmental Engineering at the University of New South Wales, Sydney. He leads an interdisciplinary research group focused on understanding the fate of contaminants in aquatic and atmospheric processes in environmental, health and engineering systems. He has 30 years' experience in the chemical and sensorial characterisation of volatile organic compounds (VOCs) and the development of management approaches to understand community perception and engagement.
